

REMARKS

Claims 1, 2, 3, 6 and 9-11 remain in this application. Claims 4, 5, 7 and 8 have been amended by eliminating multiple dependencies. Attached hereto is a marked-up version of the changes made to the claims by the current amendment. The attached page is captioned "Version With Markings to Show Changes Made."

The support for these amendments is found in the claims as originally filed. These amendments are being entered to bring the claims into conformance with, *inter alia*, 37 CFR §1.75, no new matter is added.

Respectfully submitted for Applicants,

“VERSION WITH MARKINGS TO SHOW CHANGES MADE”

THIS PAGE BLANK (USPTO)

CLAIMS

1. An article comprising a first element and a second element joined to said first element, said first element comprising a film web material characterized in that said film web material comprises a polyolefinic homopolymer having an isotacticity of less than 60% of [mmmm] pentad concentration.
2. An article according to Claim 1 wherein said film web material is stretchable.
3. An article according to Claim 2 wherein said film web material is elastically extendible.
4. An article according to any of the preceding claims **CLAIM 1** wherein said linear or branched, isotactic polymer is polypropylene.
5. An article according to any of the preceding claims **CLAIM 1** wherein said article is a hygienic article.
6. A hygienic article according to Claim 5 wherein said article is a disposable absorbent article.
7. An article according to any of Claim 1 through Claim 4 wherein said first element is a construction element of the article.

8. An article according to [any of] Claim 1 [through Claim 4]
wherein
said article is a packaging article.
9. An article according to Claim 8
wherein
said article is a package article and said first element is the wrap material.
10. A method for manufacturing a film web material comprising a step of
processing a polymeric material, said step of processing selected from the
group of casting, extruding, blowing, and combinations thereof
characterized in that
said polymeric material comprises a polyolefinic homopolymer having a an
isotacticity of less than 60% of [mmmm] pentad concentration.
11. A method for processing a film web material comprising a step selected from
the group of orienting, bi-axially stretching, crazing, stretching, shrinking, and
combinations thereof
characterized in that
said film web material comprises a polyolefinic homopolymer having a an
isotacticity of less than 60% of [mmmm] pentad concentration.
